

Instructions for 18"/36" LED B-Lights

1. Clean area where LED B-Light Strip is to be attached with rubbing alcohol or similar product before installing.
2. Using Phillips head screwdriver, open battery box and install (3) AA batteries (not included), re-attach box cover with Phillips head screwdriver

(Images may vary based on length of product - instructions apply the same for both products)

3. **IMPORTANT:** LED B-Light Strip adheres best when temperature is between 60 and 100 F.
4. Peel protective layer from 3M adhesive strip and attach to surface. **NOTE:** It is best to start removing the protective layer at the end of the light strip and not next to the wires entering into the light strip.

5. Firmly press battery box and LED B-Light Strip to secure in place.

Note: We suggest mounting the light strip by starting from the middle and working out.

6. Light up the world!!

Features

- 5-minute automatic shutoff
- Mount Anywhere
- Weatherproof
- No Wiring Needed! Just peel, stick and go!
- Double click the button to shut off

Disclaimer: Warranty B-Light is warrantied against manufacturer defects for 90 days.
